

Please leave our Wisconsin NO CALL policy in place. It is so nice not receiving bother some phone calls for stuff we don't need or want. It is bad enough the amount of junk mail, we get as consumers. Considerings more then half of my mail I toss. If you want to work on something please try stopping some of the junk mail we get. No wonder the cost of stamps go up. Well if we didn't get these no brainers to work on, such as no junk mail and telemarketers phone calls which are not wanted; maybe the government could conker more important items like health care and social security. I think tax payers would like our money spent on better things then junk mail and phones call we don't need or want. I thought we live in America and our rights should be protected, if we do not want to receive them, they should respect that. Thanks!!!!
